

# Modular Air Handling Unit

## FEATURES

### NO COLD BRIDGE

Double panels fitted with high pressure PU foam and specially designed insulation method to isolate all metal surfaces inside the air handling unit from outside air which eliminate the possibility of cold bridge. Therefore, no condensation will happen and at the same time minimize loss of energy.

### PANEL STRUCTURE DESIGN

Panel is made of powder coated double steel (outer and inner both) with high pressure polyurethane foam fitting in between, thus offering a rigid and robust panel.

Frame is made of aluminum alloy which is fastened to the panel, as a result, the unit is strong and lightweight.

### LOW AIR LEAKAGE

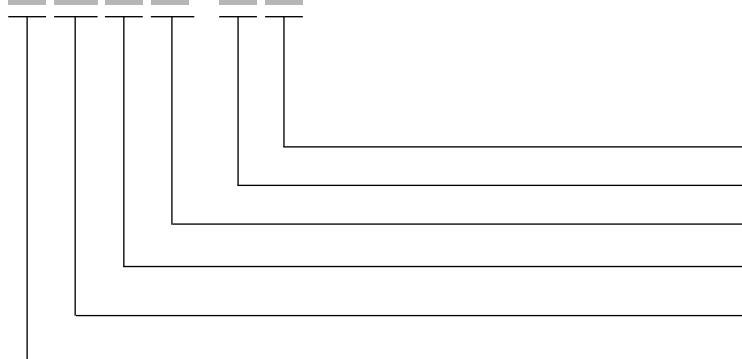

Thanks to the high pressure PU foam fitting, and special design insulation method to guarantee no low air leakage.

### LOW NOISE

Thanks to the rigidly bolted panel, dynamically and statically balanced fan assembly with spring isolator and closely integrated section, maximum to reduce the vibration and noise.

## NOMENCLATURE

H AH 18 30 – 25 H

### COIL DESIGN

All coils are designed by professional computer selection software, proved through the lab testing and real life application.

### MODULAR DESIGN

HYC modular AHU design is adopting modular concept in both the length and width, making it flexible and robust to suit different site conditions. Panels are fastened with bolts and nuts, thus making site installation work easy but with factory standard assembly finishing.

### FUNCTION SECTIONS

As modular design, multi function sections could be combined as real site conditions. Available sections include:mixing, fresh air, return air, exhaust air, prefilter, secondary filter, hepa filter, cooling coil, heating coil, electrical heater, humidity, fan, sound attenuation, access door, diffusion, all those sections etc.

H: Horizontal; V: Vertical;

Insulation thickness: mm

Model: width modulus

Model: height modulus

AH: Air Handling Unit

HYC Product

## SPECIFICATION

### Cooling performance parameter

The performance values refer to the following conditions:

- Fresh air condition: Air inlet temperature: DB35 °C /WB28 °C, water in/out temperature: 7/12 °C.
- Return air condition: Air inlet temperature: DB27 °C /WB19.5 °C, water in/out temperature: 7/12 °C.
- HYC reserve the right to make changes for above parameters without prior notice.
